## **DETAILED ACTION**

### ***Response to Amendment***

The Affidavit filed on June 30, 2006 under 37 CFR 1.131 is sufficient to overcome the Muller et al. reference.

Claims 1-13 are pending in the instant application.

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**In the title**, pursuant to MPEP 606.01, the title has been changed as follows,

-- LIGHT EMITTING DEVICES WITH A PHOSPHOR COATING HAVING EVENLY  
DISPERSED PHOSPHOR PARTICLES AND CONSTANT THICKNESS --.

**In the abstract**, pursuant to MPEP 608.01(b), the abstract has been replaced in its entirety with the following paragraph,

-- A light emitter, being an LED or laser diode, is disposed above a base substrate, and a coating material containing a dye compound, such as an epoxy material containing a fluorescent or luminescent substance, is applied over the light emitter. The base substrate includes a raised platform on which the light emitter is mounted, such that the light emitter is supported at a prescribed distance from the surrounding base substrate. The device allows the dye compound within the coating material to settle into the recessed base substrate surrounding

the platform and leave the sides of the light emitter able to retain only a coating of the dye comparable in thickness to that coating remaining on the upper surface of the light emitter, in order to improve the uniformity of the light distribution pattern emitted from the device.--

***Allowable Subject Matter***

Claims 1-13 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of a coating having an adhesive material and particles of another substance, wherein the coating is in direct contact with the light emitter in the cavity, wherein when the coating is applied over the light emitter, the platform the cavity, and the through allow the particles in the coating to be evenly settled on and around the light emitter within the cavity before the coating is cured, resulting in an evenly dispersed, uniform thickness particle coating over the light emitters, the thickness of the particle coating being constant with respect to the light emitter.

Regarding claims 2-13, claims 2-13 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
